Curating like Tactics and Strategy – Bible of a Vineyard Neighbourhood

I. Plan a Wealthy Neighbourhood

I characterize the neighbourhood to be wealthy. I then plan it as wealthy, we have one problem – no activity, practices and daily life.

II. I plan daily life as a tactic and strategy –

I. A Map
II. Spontaneity for finance, connectivities and even daily life of invitations
III. I tactically produce a plan

Principal contradiction is here in this vineyard owning class –the wealth and its owners against the other wealth and owners for in fact meeting.

Secondary contradiction is here – a way of meeting.

Secondary turned principal – is to give them a plan – a map of all things – as in fact politician and activist.
